CORONA VIRUS

About

The 2019–20 coronavirus pandemic is an ongoing pandemic of coronavirus disease 2019 (COVID-19) caused by severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2). The outbreak was first identified in Wuhan, Hubei, China, in December 2019 and recognised as a pandemic by the World Health Organization (WHO). Regions affected by major outbreaks include mainland China, Europe, Iran, South Korea, and the United States.

The virus primarily spreads between people in a similar manner to influenza, via respiratory droplets from coughing or exhaling. The time between exposure and symptom onset is typically five days, but may range from two to fourteen days. Common symptoms include fever, cough and shortness of breath.

Affected Area	Reported Cases
	10,000+
	1,000-9,999
	100-999
	10-99
	1-9

# NATIONAL WORKSHOP ON WEB TECHNOLOGY

Join us on Saturday afternoons for a very hands on, very project oriented exploration of internet technologies. Sessions run every Saturday afternoon from 3:00-4:30pm. You can register for individual sessions or for a discounted six-week package. Participants can start anytime they want, sessions do not have to be consecutive.

New students will be introduced to the current group class project and brought up to speed at their own pace. When they are ready and interested they will have the opportunity to do an individual or partner project at the same time. They will build real, interactive web pages from the ground up using current internet development techniques and interface design.
